Through songs, games, and free play using specialist equipment like balance beams, sensory mats, and coordination tools, our sessions nurture children's physical, emotional, and social development at their own pace. We prioritize emotional connection and a gentle, curiosity-driven approach over forced engagement, creating a secure environment where children explore when they are ready.While structured activities like action songs provide a comforting routine, the heart of our program lies in child-led exploration; we actively follow their lead, mimicking their actions and offering creative variations as they interact with our specialized gear to build strength, balance, and dexterity. This safe space also allows them to navigate social relationships naturally as we model positive interactions. Every moment is conducted entirely in English, promoting organic language acquisition in a stimulating, active, and fun environment.

A cura di SOFT CIRCUS an innovative, exciting, safe and inclusive association that leads toddlers, children, adults and the elderly to develop all the skills associated with circus and learning english.
